Choosing the right course for you:

This course has been designed to support you to understand how to help your child in school by exploring how to make reading fun. You will be able to explore different reading strategies through a variety of reading materials and practical activities.

The course is suitable for learners with little experience or knowledge. Most learners will not have any previous knowledge of the subject taught, but this is not always the case and the tutor will adapt the learning activities to suit all abilities and needs after meeting you all in week 1.

Learning Intent – what you will learn about:

This short course will support you to understand:

- The value of using a wide range of reading materials with your child.
- The reading strategies used in schools
- How to be more confident in supporting your child's reading
- How to make reading fun using games, activities, and props
- How to choose safe online resources that will help you to support your child's reading at home.

What to expect:

When you enrol your course, you will also be given details of how to join our secure Google Classroom, how to use Google Meets and your tutor will email you about starting your course.

You are assessed in class by the tutor and by your own self-assessment of topics. You will be given an online RARPAP/diary on which you and the tutor will be able to chart your progress each week. Your tutor will give you feedback and suggest ways in which you can improve and help your child's learning.

You will be given a small number of home-time tasks, linked to helping your child and to support other areas of learning you have identified.

So that you can be successful in completing the course we do require that you arrive promptly for each lesson, and that you try not to miss any (you need to agree to attend at least 80% of the lessons).

Entry requirements:

There are no formal entry requirements for Family Learning courses.

All Family Learning courses are free to learners.
